

AUSTIN HARDAWAY

austinhardaway@gmail.com – 9033431017 – Athens, GA – <https://austinhardaway.site>

EDUCATION

University of Georgia

BS Computer Science and Mathematics

Fall 2015 – Spring 2019

Athens, GA

EXPERIENCE

Macys Technology

DevOps Intern

May, 2018 – August, 2018

Johns Creek, GA

- Embedded into the D2C DevOps team and contributed to Kanban sprints. Also designed and implemented a capstone project
- Designed and implemented centralized CI/CD build pipeline for Java microservices in the Jenkins DSL. Then presented and defended implementation to upper management and senior developers.
- Maintained build and deployment infrastructure (GitLab/Jenkins/Artifactory/Chef)
- Drove paradigm shift from GitFlow to TrueCI
- Contributed to large migration of code from legacy vm based infrastructure to a new containerized infrastructure
- Jenkins, Groovy, Chef, Python, Linux (CentOS), bash

WoodmenLife

Software Engineering Intern

May 2016 – July 2016

Omaha, NE

- Worked on a small team responsible for an internal site for viewing business metrics as well as a consumer facing site for viewing policies
- Implemented new system-wide messaging microservice in Java
- Responsible for daily bug-fix/refactor tickets throughout the full stack
- Java/Spring, SQL(MySQL, DB2, OracleDB), JSP, HTML/CSS/JS

UGA CSCI Department

Peer Learning Assistant (TA)

August 2014 – Current

Athens, GA

- I TA CSCI 1301, a rigorous introduction to object oriented programming and the Java language.
- Grade weekly programming assignments
- Attend labs and lectures and field questions from students ranging from general programming to grading policies to specific help with debugging and implementation

PROJECTS

Portfolio Mk. 2

[Node.js, Vue, Bootstrap, Heroku](https://austinhardaway.site) <https://austinhardaway.site>

Redesigned portfolio to unify the information between my resume and my online professional presence. All content from both is defined and retrieved from a central JSON file and rendered serverside.

Java Math App

[Node.js, Vue, CSS/HTML \(No Frameworks\)](https://java-math.herokuapp.com) <https://java-math.herokuapp.com>

Web App designed to help my 1301 students practice math with data types. It generates random values and then gives the student a series of expressions. The student is then asked for the resultant value and data-type

(in Java).
