EXPERIENCE

AT&T

July, 2019 - Current

TDP Software Engineer I

Dallas, TX

- Implemented, tested, and deployed production ready application first 6 months, faster and utilizing fewer resources than expected.
- Implemented, tested, and deployed NodeJS chatbot.
- Appointed National Coordinator of the Face the Floor Leadership committee, an internal shark-tank like competition.

Macy's Technology

May, 2018 - August, 2018

DevOps Development Intern

Johns Creek, GA

- Embedded into the D2C DevOps team and contributed to Kanban sprints. Also designed and implemented a capstone project
- Designed and implemented centralized CI/CD build pipeline for Java microservices in the Jenkins DSL. Then presented and defended implementation to upper management and senior developers.
- Contributed to large migration of code from legacy vm based infrastructure to a new containerized infrastructure.

WoodmenLife

May, 2016 - July, 2016

Software Engineer, Intern

Omaha, NE

- Worked on a small team responsible for an internal site for viewing business metrics as well as a consumer facing site for viewing insurance policies
- Responsible for daily bug-fix/refactor tickets throughout the entire Java Spring stack

EDUCATION

University of Georgia

2015 - 2019

B.S. Computer Science, B.S. Mathematics

Athens, GA
